

Aeolus Seeds Sounds Snippets

Thank you for downloading the Aeolus Seeds sound examples! If you want to push further your investigation, please refer to the module webpage (<http://www.shakmatmodular.com/products/as.html>) for user manual and videos.

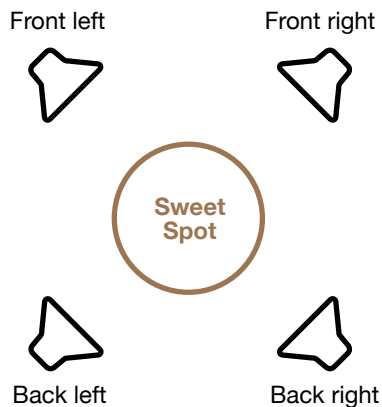

In order to listen to this demo, you must have a quadraphonic setup and a computer allowing to output 4 distinct channels.

01. Import the two .wav files (16bits / 44.1kHz) in your favorite DAW/Audio editor.

Make sure to align the start points carefully.

02. First file (Front LR) should be routed to the two front speakers.

03. Second file (Back LR) should be routed to the two back speakers.

04. Make sure both file are played at the same volume

05. Sit, press play and enjoy :)
